Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/22/2005 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9, 10, 12, 33, 40 and 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Kumano (6,047,252).

As to claim 9, Kumano teaches a terminal/brower (Figs.12 & 29) connected to a network for retrieving information via a first relay (160) relaying translated/targeted data and second relay (150) relaying original/source data, comprising:

Information acquisition section (150, 160) ;

A translation instruction recognition unit (303, 140);

Where in either a translated information or a source information is relayed (Figs.7-11); and

A display unit (302) for displaying the information, where in both the target information (Fig.7, 204) and the source information (Fig.7, 202) are displayed side-by-side.

According to Kumano "the invention is to provide a method for displaying a source text and a target text obtained as a result of machine translation independently on a single display unit (an Internet browser) and more particularly to a machine translation method and a source/target text display method enabling a flexible, high level display or displaying of corresponding parts between the source text and the target text in correspondence with each other. (Col.2, lines 1-9).

As to claim 10, Kumano teaches where the text is divided into units and the source data is translated according to the user request (Fig.29).

As to claim 12, Kumano teaches a display, where the display (Fig.27) comprises a plurality of screen section (202, 204), wherein the information before being translated and the translated information are displayed respectively in the screen are at different section.

With regard to claims 33 and 40, Kumano teaches processing text data having display information (141, 142); data access portion where the text is divided into units for translation and displayed in sections (Fig.27).

Claim 41 is analogous to claim 9 and is rejected by Kumano for the foregoing reasons.

Response to Arguments

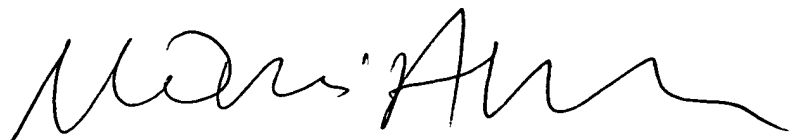

Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
